Technical specifications

01 Apps can be installed on 2 mobile devices and 2 desktops, managed via your myDartfish account

02 50 GB of cloud storage to back-up your data and free-up space on your devices

03 Work offline and sync data when connected to the Internet

04 Capture using your device's camera

05 Import from your camera roll or from other apps

06 DV, MPEG-2, MPEG-4, VOB, M-JPEG

07 AVCHD camcorders, DV/HDV, camcorders, hard disk/memory camcorders, photo cameras, webcams, network path, etc...

08 Support professional video feeds (SDI, HDMI) via BlackMagic Pro Recorder* or AVermedia LGP* converters *
(* device sold separately)

09 Wide range of camera brands supported: Bosch, Axis, Dahua, Lilin, PTZ Optics

10 With the «Share my Camera» function in myDartfish Express

11 Encode video during capture

12 Replay video even while recording is in progress

13 Automatically creates a single video when long recordings are saved as multiple files by the camera

14 Hides or removes unwanted footage at the beginning or end of video

15 Freehand, line, circle, rectangle, arrow

16 Selectively add events to montage and create your game highlights

17 Change duration of events, re-order them and add drawings to make the perfect highlights

18 Bookmark moments of special interest within events. Annotate and draw on them. Share with video and events

19 Bring many videos into a single project

20 Identify the keywords needed to breakdown your games and assign them to buttons (* denotes use of Dartfish Note App only)

21 Define teams and squads and show buttons and lists of rostered players. Player selection can even be changed during the game

22 Use group boxes and tabs to define your own screen layout for efficient tagging

23 Use myDartfish Note (iOS,Android) or On-Field (Windows) for full-throttle tagging without video

24 Conveniently use a mobile device to tag live during the game then match events to video afterwards

25 Import events captured by 3rd party apps and easily merge them to the video

26 Capture and tag the video as the game unfolds

27 Identify where the action took place on the field by recording coordinates and named zones

28 Use button clicks to activate other buttons or panel pages: Make tagging efficient by multi-tagging events in a single click and make the best use of screen space

29 Select IP camera preset views from the tagging panel

30 Share your tags from the analyst to the coach in real time and tag collaboratively

31 Change keyword tags, modify In and Out Point, add description.

32 Search events by keyword, name and description

33 Summarize frequency and duration data in stats tables and graphs

34 Clicking the headings and numbers from reports reveals relevant video

35 Add transitions, titles slides, watermarks, etc.

36 Export events and keywords to CSV for statistical analysis in 3rd party software

37 Copy tables, graphs and images to documents and presentations
